Up and Over doors for every home

Choose from an assortment of colours and materials including steel, grp and timber. All doors are manufactured within a rigid box section chassis that is constructed from high-grade galvanised steel to provide a strong and stable door panel.

Our Up & Over garage door range is manufactured with your safety and security in mind, and as such all of our doors comply with British Standard BS EN 13241.

Look for the Secured by Design symbol  to see which models can be upgraded to offer even greater security.

The modern elegance of Georgian panels

Our superb range of Georgian panel style doors will look good on any house type, whether modern or traditional. All have deep, crisp panel profiles, which gives them an elegant appearance, to complement their solid and sturdy characteristics.

10

11

12

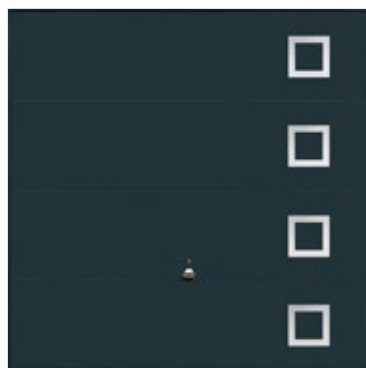

13

The look of timber, the benefit of GRP

These classically proportioned doors will integrate equally well into the architecture of traditional and modern housing. The surface finish of the timber effect GRP doors is not only different by colour, but also by its underlying appearance. Some designs come in close grain which looks like carefully sanded wood, whilst wide grain has a more rustic character.

Timber panel doors

For some customers, there is no substitute for a timber garage door.
If you insist on the traditional values of craftsmanship and natural materials
then the warmth and character of a timber door is certainly for you.
For timber door options, please see pages 22 – 23.

Traditional side-hinged doors in steel, grp and timber – Quality craftsmanship and attractive, traditional appeal

Garador's traditional side-hinged doors combine robust and reliable performance with simple personal access. These doors are fitted with a lever handle inside and out, providing easy access at all times. For added security, the option of an outside knob is available. Side-hinged doors come with equal sized leaves, with the right hand leaf leading as standard. 1/3 - 2/3 leaf configurations and/or left hand leading doors are available on request. For colour and handle options, please see pages 20 – 23.

Highest level of safety and security

Choosing an operating mechanism that is suitable for your garage is as important as choosing the right door panel. This section explains the difference between the two types of Up & Over mechanisms: canopy and retractable. If you need more information, our technical services department are always happy to help.

Canopy door

A canopy door requires less space for opening, but one-third of the door protrudes from the garage while open.

Only single door version available.

An optional 4 point locking kit is available. It comprises steel locking bar rods and slam-shut latches to increase the number of locking points.

BS 13241 Compliant

All Garador garage doors comply with the latest European safety standards.

Retractable door

A retractable door opens along horizontal tracks inside the garage and travels back into the garage space when opened.

Retractable mechanisms are ideally suited to automatic operation.

Single or double door version available.

An optional 4 point locking kit is available. It comprising steel locking bar rods and slam-shut latches to increase the number of locking points.

BS 13241 Compliant

All Garador garage doors comply with the latest European safety standards.

1

2

3

4

- 1 Secure 2-point locking preventing unauthorized entry.
- 2 Zinc-coated torsion spring for durability and a clean, finished look.
- 3 Cast alloy cable drum.
- 4 Anti-drop device to prevent the door from crashing down in the event of a spring or cable failure.

1

2

3

4

- 1 Secure locking to prevent from forced entry.
- 2 Multiple spring cassette and pivot arm cover providing trap protection to reduce the risk of injuries.
- 3 Secure parking position to prevent the door from uncontrolled closing.
- 4 Optional Retractable Plus offers specially designed lifting arms including bottom spring brackets for narrow openings which allow for maximum use of the clear passage.

Enjoy the benefits of a sectional door

A sectional door is made up from separate sections rather than a single panel. This allows for exceptionally smooth operation both manually and especially when electrically operated. The superb engineering employed in the manufacture of Garador's sectional doors ensures they are amongst the finest garage doors available.

Sectional doors have many other advantages over traditional up and over doors such as maximising the drive-through width of a garage opening allowing for close parking inside and out and giving greater headroom clearance to accommodate vehicles such as 4 x 4 and MPVs.

Linear Medium

FGS 015

Linear Large

FGS 515

Steel sectional doors

Garador Sectional doors are the best engineered garage door on the market, providing excellent security and no loss of driveway space in front of the garage as the door rises vertically. These doors have exceptionally smooth operation, both manually and when electrically operated.

Insulation options

Garador Sectional doors are ideal for integral garages and workshops where thermal insulation can be very important. Available in Premium insulated option or the Classic single skinned version and a variety of surface finishes, including ribbed and panelled variations, these doors are the discerning buyer's choice.

Premium

To ensure the highest levels of thermal insulation and structural rigidity, each 42 mm thick double-skin steel section is evenly filled with 100 % CFC-free PU rigid foam and a seal between each section. Premium sectional doors have a U-Value down to 1.30 W/m²·K for a fitted door.

Classic

Single-skin door sections are bonded on the inside to steel profiles without rivets. This special bonding technique produces excellent stability and quiet door action.

Your safety is our commitment

We firmly believe that you can't make anything too safe and secure. So we are constantly searching for new ways to improve safety on our doors and give our customers what they deserve. After all, providing a secure environment is the primary job of any garage door.

1 Reliable anti-drop devices

No matter whether your door comes with a tension spring or a torsion spring assembly: a Garador sectional door is protected against crashing down as the anti-drop device catches the door in the unlikely event of a spring or cable failure.

2 Safety door travel

The combination of adjustable rollers, solid roller brackets and safety tracks prevent the door from derailing.

BS 13241 Compliant
All Garador garage doors comply with the latest European safety standards.

3 4 Sealings

All doors come with side, floor and fascia seals whilst the Premium sectional door also comes with intermediate seals between every section joint to enhance thermal insulation.

5 Long-term protection

For corrosion protection, Garador sectional door frames are fitted with a synthetic bed-plate. This provides protection against corrosion that might be caused by humid acids or salts.

6 Side hand guard

With Garador sectional doors the side tracks are completely enclosed so that fingers cannot get trapped.

7 8 Pinch protection

With Garador sectional doors each section rebate is optimally shaped as a finger protection profile effective on the inside and outside of the door as well as on the hinge parts.

9 Thermoframe

Garador's exclusive thermal frame option provides up to 15% improved insulation on premium doors providing even greater thermal efficiency to your home.

Experience the GaraRoll's space saving design

The GaraRoll is a roller garage door, offering a compact solution for garages that need to retain ceiling space or access to the roof. These doors are constructed from insulated aluminium laths that lift vertically and then roll into a box at the head of the garage door opening.

GaraRoll

The GaraRoll is a premium roller door, with an electric powered operator built in as standard. It is the only spring-balanced roller door which uses force limitation built into the operator to ensure the door is always safe to use. Supplied with two 868 MHz high-security encrypted frequency hand transmitters.

GaraRoll Lite

The GaraRoll Lite has a tubular motor-driven design with an optical sensor built into the door seal, to stop it when an object obstructs its path. Supplied with two hand transmitters, using 433 MHz rolling code technology, and comes in a choice of 3 colours.

GaraRoll Lite Traffic White (RAL 9016).
Anthracite Grey and Golden Oak available.

GaraRoll roller doors

The GaraRoll combines a space saving design with the convenience of an electrically operated automatic door. Supplied with two hand transmitters as standard, offering homeowners an all-inclusive solution without the need for optional extras. Choose from our range of beautiful colours and timber effect finishes.

The aluminium profiles of our roller garage doors are filled with a CFC-free polyurethane foam which provides a good thermal insulation to enhance energy savings and contributes to a quiet door action.

GaraRoll Lite profile with thermal insulation¹

The aluminium profiles of the GaraRoll Lite feature two linear indentations which run horizontally. Each lath is 77 mm high and is filled with polyurethane rigid foam for strength and a quiet door travel.

GaraRoll profile with thermal insulation²

The aluminium profiles are 77 mm high and are filled with polyurethane rigid foam for strength and a quiet door travel.

GaraRoll Window²

Add a window for an individual design and the use of daylight in your garage. The number of elements depends on the respective door width.

A maximum of ten profiles can be fitted with glazings in each door.

GaraRoll ventilation grilles²

Ventilation of your garage improves the room climate and prevents mould.

A maximum of ten profiles can be used for each door.

¹ Available for GaraRoll Lite only.

² Available for GaraRoll only.

Stylish, secure and thermally efficient FrontGuard doors

The Garador FrontGuard collection is comprised of three ranges: Modern, Contemporary and Classic.

The perfect match

The wide range of designs, colours and glazing options allow you to create a door that perfectly matches your property. We also offer a range of FrontGuard doors to perfectly match a garage door from the current Garador range.

High thermal insulation

FrontGuard doors provide excellent thermal insulation with U-values down to 0.87 w/m²k. This is achieved through a heavily insulated door panel, thermal breaks built into the frame and rubber seals on both the door leaf and frame.

Security for peace of mind

All doors are manufactured with 5-point locking as standard, to provide extra security. All doors are fitted with 3 additional security bolts on the hinges, making it practically impossible to force the door open. RC2 security equipment as standard.

Easy to install

FrontGuard doors feature 3 way adjustable hinges with safety pins for a quick and easy installation. These hinges can be easily and precisely adjusted to ensure a smooth opening and closing motion.
