

AD95 Rapid Roll Doors

The AD95 RAPID ROLL door offers opening speeds normally achieved with PVC speed doors but Combined with security and insulation making it suitable for use as a stand-alone external door for High-use openings.

The doors are constructed from 95mm foam filled insulated profiles and finished with an aluminium extruded bottom which carries small bore opto rubber weather seal for the wireless safety edge.

The doors are powered by a GFA (German precision engineering) direct-drive 3-phase motors and Electric's to provide opening speeds of up to 2000mm per second (dependant on door size and motor Required) and closing of 500mm per second. The frequency inverter control provides soft-start and Soft-stop to minimise wear and tear and results in smooth and quiet operation.

- Designed specially for industrial use
- Very strong yet light and durable
- Laminated anti-scratch coating for extended life span
- Also suitable for large domestic applications
- Excellent wind resistance up to 10m wide class 5
- Compact roll-up diameter
- Also available in standard speed

The doors are Available with a wide variety of automation options including: i-falcon motion sensors, ground Induction loop, traffic lights, remote control, As standard the door will come with wireless safety edge kit and photocells to both sides of the door. The doors are available up to standard sizes of 5 metres wide. and 5 metres high although special sizes may be available on request.

AD95 Compact Doors

The AD95 compact insulated door offers a high quality robust and compact solution with a contemporary design suitable for all retail, commercial and industrial applications. The pu foam Filled curtain ensures minimal heat loss with maximum energy savings along with a big reduction in carbon foot print. Designed and manufactured to exact structural openings and available in galvanised as well as hard wearing and durable Laminate finishes.

AD95 is available on either GFA or ellard motor options with optional extra costs such as safety edge and photocells. Quite simply a great looking door for a fraction of the cost.
